DETAILED ACTION

Allowable Subject Matter

Claims 1-10 and 12-24 are allowed. The following is an examiner's statement of reasons for allowance:

The claimed invention is a light-emitting device comprising:

- An anode comprising a semi-transparent layer having a high reflectivity and a high work function, where the semi-transparent layer has a reflectivity of at least 86%; and
- A cathode comprising at least one first cathode layer of a low work function material selected from metal, metal oxide and combinations thereof, and at least one second cathode layer having a high reflectivity and a high work function
- At least one emissive layer disposed between the anode and first cathode layer wherein the emissive layer is in contact with the first cathode layer
- Where the device is a metal etalon microcavity structure.

Reference Kanai et al. (US 6,151,727) do not disclose the emission layer is not in direct contact with the first cathode layer.

Reference Antoniadis et al. (US 6,366,017) do not disclose the emission layer is not in direct contact with the first cathode layer and the DBR is not a cathode layer.

Therefore, the above references do not disclose the claimed invention of the present application and claims 1-10 and 12-24 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wai-Sing Louie whose telephone number is (571) 272-1709. The examiner can normally be reached on 7:30 AM to 4:00 PM.
